

## **Aero Power And Propulsion Test Engineering Branch (DRD)**

Provides mechanical and electrical test engineering support to the Center's aeropropulsion projects in the 10x10 Supersonic Wind Tunnel, the 8x6/9x15 Wind Tunnel Complex, the Propulsion Systems Laboratory, and the Engines Component Research Lab. Support includes: assurance of operational test facilities; test planning; project management to prepare the research article for testing; integration of the research hardware into the test facility; operation of the test facility, including calibrations; development or incorporation of new test technologies; data validation and analysis; and delivery of data to the customer.
